ARTIFICIAL INTELLIGENCE FOR EVERYONE · MINI PROJECT

AI Study Planner for Exams

Using AI tools to turn a syllabus and an exam date into a personalised study plan, notes and practice quizzes

Ritukumari Agarwal

01 · INTRODUCTION

Why Exam Planning Needs AI

Exams reward students who plan well, not only those who study long. Modern AI tools can read a syllabus, work backwards from an exam date and produce timetables, summaries and quizzes in minutes.

Plan

Break a large syllabus into daily, achievable goals.

Practise

Turn notes into flashcards and quizzes automatically.

Improve

Adjust the plan using quiz results and weak areas.

02 · PROBLEM STATEMENT

The Real-World Problem

Too much syllabus

Students are unsure what to study first and how long each topic needs.

One-size timetables

Generic plans ignore weak topics, difficulty and the real exam date.

Last-minute cramming

Weak revision leads to stress, burnout and lower marks.

Who is affected: school and college students preparing for semester and competitive exams.

Objectives and Scope

1. Collect student inputs: syllabus, exam date, daily hours and weak topics.
2. Generate a personalised day-by-day study plan with revision time.
3. Create summaries, flashcards and practice quizzes from study material.
4. Compare time and effort against manual planning.

Scope: demonstrated on a sample three-subject exam using free AI tools.

AI Tools Used

Tool	Role in the project	Output
Claude / ChatGPT	Plans the schedule and explains topics	Timetable, quiz questions
NotebookLM	Reads uploaded notes and books	Summaries, key points
Quizlet	Flashcard practice	Flashcard sets
Canva / Gamma	Visual design	Slides and visuals
Google Calendar	Reminders	Scheduled study blocks

05 · METHODOLOGY

How the System Works

1

Input

Syllabus, exam date, daily hours, weak topics

2

Analyse

AI ranks topics by weight and difficulty

3

Plan

Weekly and daily timetable with revision days

4

Practise

Summaries, flashcards and quizzes

5

Adjust

Update the plan from quiz results

Each step uses a different AI tool, covering input, analysis, generation and feedback.

The Prompt Behind the Plan

Act as an exam study coach. My [subject] exam is on [date]. Syllabus: [topics]. I can study [4] hours a day and I am weak in [topic]. Create a day-by-day plan with revision days, a weekly mock test and short breaks. Show it as a table.

- **Role:** the AI acts as an exam coach
- **Inputs:** subjects, exam date, hours per day, weak topics
- **Output format:** a table with revision and mock tests

07 · OUTPUT 1

Sample Weekly Study Timetable

Day	Subject and topic	Activity	Hours
Mon	Maths: limits and derivatives	Learn + 10 problems	4
Tue	Physics: kinematics	Notes + numericals	4
Wed	Chemistry: organic basics (weak area)	Extra time + flashcards	4
Thu	Maths: integration	Learn + 10 problems	4
Fri	Physics: laws of motion	Notes + numericals	4
Sat	Revision of Mon to Fri	Flashcards + weekly quiz	4
Sun	Rest and light review	Check and adjust plan	2

Illustrative output for an exam in 30 days. Replace with your own generated plan.

Flashcards and Practice Quiz

Sample flashcard

Q: What is velocity? A: The rate of change of displacement. It is a vector quantity.

Sample quiz question

Which functional group defines alcohols? A) -OH B) -COOH C) -CHO D) -NH2. Answer: A, because alcohols contain the hydroxyl group.

09 · EVALUATION

Results and Limitations

Results

- Planning time: [__ hours] manually vs [__ minutes] with AI
- Full syllabus covered with revision buffer days
- Weak topics receive extra time
- Quizzes give quick feedback

Limitations

- AI can make mistakes, so verify against textbooks
- Quality depends on accurate student input
- It cannot replace discipline and real study
- Free tools have usage limits

Conclusion and Future Scope

AI makes exam planning faster, more personal and less stressful.

- Adaptive plans that change with quiz scores
- A mobile app or WhatsApp bot for daily reminders
- Gujarati and Hindi support for wider access

Tools: Claude, ChatGPT, NotebookLM, Quizlet, Canva, Google Calendar
